Contents of Volume 112

Number 1, 7 January 1985

AGIL, G., On the Structural Complexity of Simple Biosystems	1
ENDELSON, N. H., A Model of Bacterial DNA Segregation Based upon Helical Geometry	25
ETISOVA, Z. G., BORISOV, A. Y. and FOK, M. V., Analysis of Structure-function Correlations in Light-harvesting Photosynthetic Antenna: Structure Optimization Parameters	41
LOFMAN, M. A., Neuronal Correlates of Corticalization in Mammals: A Theory	77
RANSOME, E. D., JR., HENDRY, L. B., MULDOON, T. G., MAHESH, V. B., HUTSON, M. S. and CAMPBELL, L. K., Apparent Stereochemical Complementarity of Estrogens and Helical Cavities Between DNA Base Pairs: Implications for the Mechanism of Action of Steroids	97
VADE, M. J., The Influence of Multiple Inseminations and Multiple Foundresses on Social Evolution	109
RBIB, M. A. and AMARI, S-I., Sensori-Motor Transformations in the Brain (with a Critique of the Tensor Theory of Cerebellum)	123
ELVILLE, A., LASZLO, P. and NELSON, D. J., Calmodulin: Calcium, Potassium, and Magnesium Ion Multiple Equilibria and Kinetics for Interconversion, Including the Effect of Repeated Stimulation	157
REMIA, D., Is There a Continuity of Filaments in the Sarcomere?	177
ONSIN, G. and POWNALL, H. J., Equilibrium of Apoproteins Between High Density Lipoprotein and the Aqueous Phase: Modelling of <i>in vivo</i> Metabolism	183
UF, E. G. and MIKULECKY, D. C., Compartmental Analysis of the Na^+ Flux Ratio with Application to Data on Frog Skin Epidermis	193

Number 2, 21 January 1985

KHARKATS, YU. I. and KRISHTALIK, L. I., Medium Reorganization Energy and Enzymatic Reaction Activation Energy	221
KRISHTALIK, L. I., Effective Activation Energy of Enzymatic and Nonenzymatic Reactions. Evolution-imposed Requirements to Enzyme Structure	251
HOUSTON, A. I. and McNAMARA, J. M., The Variability of Behaviour and Constrained Optimization	265
CARO, T. M., Intersexual Selection and Cooption	275
IWASA, Y., COHEN, D. and LEON, J. A., Tree Height and Crown Shape, as Results of Competitive Games	279
PARK, D., Does Horton's Law of Branch Length apply to Open Branching Systems?	299
JONES, K. G. C., Nitrogen Fixation as a Control in the Nitrogen Cycle	315
SYVANEN, M., Cross-species Gene Transfer: Implications for a New Theory of Evolution	333
JOHNSON, I. R. and PARSONS, A. J., A Theoretical Analysis of Grass Growth Under Grazing	341
KATZ, M. A., New Formulation of Water and Macromolecular Flux which Corrects for Non-Ideality: Theory and Derivation, Predictions, and Experimental Results	361
SCHAFER, W. M. and KOT, M., Nearly One Dimensional Dynamics in an Epidemic	401
COHEN, S. R., Why does Brain Make Lactate?	421
ROWE, G. W., A Three-Dimensional Representation for Base Composition of Protein-Coding DNA Sequences	431

Number 3, 7 February 1985

VALIQUETTE, G., ZIMMERMAN, E. A. and ROBERTS, J. L., mRNA Sequence Predictions from Homologous Protein Sequences	441
KAPPAS, U., FISCHER, W., POLYMERPOULOS, E. E. and BRICKMANN, J., Solvent Effects in Ionic Transport Through Transmembrane Protein Channels	451

BROWN, J. L. and PIMM, S. L., The Origin of Helping: The Role of Variability in Reproductive Potential	465
ELLEN, T. B., Multiple Parathyroid Tumors: A Statistical Method for Distinguishing Multiple Adenoma from Hyperplasia	479
OLDSTEIN, B. N. and SHEVELEV, E. L., Stability of Multienzyme Systems with Feedback Regulation: A Graph Theoretical Approach	493
ONT, W. S., The Geometric Progression of Nuclear Volumes	505
LOSKOWITZ, N. and PUSZKIN, S., A Unified Theory of Presynaptic Chemical Neurotransmission	513
MAHOR, S., On the $-3/2$ Power Thinning Law in Plant Ecology	535
MUNTON, S. L. and BIRCH, G. G., Accession of Sweet Stimuli to Receptors. I. Absolute Dominance of One Molecular Species in Binary Mixtures	539
IBLY, R., CALOW, P. and NICHOLS, N., Are Patterns of Growth Adaptive?	553
MOIT, E. O. and ANTON, H. J., Derivation of the Frequency Distributions of Cycle Durations from Continuous Labeling Curves	575
OWELL, G. E., Relaxation Times in Chemostat Culture	589
UGER, P., Stability of Interacting Populations with Age-Class Distributions	595
LEDGES, R. W., Inheritance of Magnetosome Polarity in Magnetotrophic Bacteria	607
ERRANDINO, F. J., A Mathematical Model of Biological Development	609
LVAREZ, J. and TORRES, J. C., Slow Axoplasmic Transport: a Fiction?	627
AYLOR, D. B. and SPIVAK, C. E., The Activation of the Nicotinic Acetylcholine Receptor by the Transmitter	653

Number 4, 21 February 1985

GU, M. and YOKOI, Y., A Stochastic Description of Branching Structures of Trees	667
GUR, Z., Randomness, Synchrony and Population Persistence	677

MATSUMOTO, G., URAYAMA, M. and ICHIKAWA, M., Modified Hodgkin-Huxley Gating Kinetics of Sodium Activation in Giant Axons of Squid (<i>Doryteuthis bleekeri</i>)	695
CUMMINGS, F. W., A Model of Pattern and Form in Development	707
ASHIDA, H., General Solution of Cable Theory with Both Ends Sealed	727
CONRAD, M. and HASTINGS, H. M., Scale Change and the Emergence of Information Processing Primitives	741
ANTILLÓN, A. and ORTEGA-BLAKE, I., A Group Theory Analysis of the Ambiguities in the Genetic Code: on the Existence of a Generalized Genetic Code	757
FOCARDI, S., DENEUBOURG, J. L. and CHELAZZI, G., How Shore Morphology and Orientation Mechanisms Can Affect the Spatial Organization of Intertidal Molluscs	771
LONGO, E., STAMATO, F. M. L. G., FERREIRA, R. and TAPIA, O., The Catalytic Mechanism of Serine Proteases II: The Effect of the Protein Environment in the α -Chymotrypsin Proton Relay System	783
TAYLOR, P. D., A General Mathematical Model for Sex Allocation	799
JEAN, R. V., A Geometric Representation of α -Polypeptide Chains Revisited	819
HILBERT, D. W., LOGAN, J. A. and SWIFT, D. M., A Unifying Hypothesis of Temperature Effects on Egg Development and Diapause of the Migratory Grasshopper, <i>Melanoplus sanguinipes</i> (Orthoptera: Acrididae)	827
LICKO, V. and RAFF, H., Rate Sensitivity of Blood Pressure to Hypoxia	839
MOREL, J. E., Discussion on the State of Water in the Myofilament Lattice and other Biological Systems, Based on the fact that the Usual Concepts of Colloid Stability cannot Explain the Stability of the Myofilament Lattice	847
ROBINSON, C. E., The Molecule-group Schema of Memory: Storage, Recognition and Retrieval	859
SMITH, H., Urospasm	877

LETTER TO THE EDITOR

ROSEN, G., Stable Heterogeneous Spatial Distributions of Oxygen and Chemotactic <i>E. coli</i> with Verhulst-Limited Population Growth	877
--	-----

Index to Volume 112

- Acetylcholine, nicotinic, receptor, the activation of, by the transmitter, 653
- Activation energy, effective, of enzymatic and nonenzymatic reactions. Evolution-imposed requirements to enzyme structure, 251
- Activation energy, enzymatic reaction, and medium reorganization energy, 221
- Activation of the nicotinic acetylcholine receptor by the transmitter, 653
- Adaptive growth patterns?, 553
- Adenoma, multiple, distinguished from hyperplasia by a statistical method; multiple parathyroid tumors, 479
- Age-class distributions, stability of interacting populations with, 595
- AGU, M. and YOKOI, Y., A stochastic description of branching structures of trees, 667
- AGUR, Z., Randomness, synchrony and population persistence, 677
- ALLEN, T. B., Multiple parathyroid tumors: a statistical method for distinguishing multiple adenoma from hyperplasia, 479
- ALVAREZ, J. and TORRES, J. C., Slow axoplasmic transport: a fiction?, 627
- AMARI, S-I. (see ARBIB, M. A.), 123
- Antenna, photosynthetic, light-harvesting, analysis of structure-function correlations; structure optimization parameters, 41
- ANTILLÓN, A. and ORTEGA-BLAKE, I., A group theory analysis of the ambiguities in the genetic code: on the existence of a generalized genetic code, 757
- ANTON, H. J. (see VOIT, E. O.), 575
- Apoproteins, equilibrium between high density lipoprotein and the aqueous phase; modelling of *in vivo* metabolism, 183
- Aqueous phase, equilibrium of apoproteins between high density lipoprotein and; modelling of *in vivo* metabolism, 183
- ARBIB, M. A. and AMARI, S-I., Sensori-motor transformations in the brain (with a critique of the tensor theory of cerebellum), 123
- ASHIDA, H., General solution of cable theory with both ends sealed, 727
- AUGER, P., Stability of interacting populations with age-class distributions, 595
- Axons, giant, of squid (*Doryteuthis bleekeri*), modified Hodgkin-Huxley gating kinetics of sodium activation in, 695
- Axoplasmic slow transport: a fiction?, 627
- Bacteria, magnetotropic, inheritance of magnetosome polarity in, 607
- Bacterial DNA segregation, a model based upon helical geometry, 25
- Base composition of protein-coding DNA sequences, a three-dimensional representation, 433
- Behaviour variability and constrained optimization, 265
- Binary mixtures, absolute dominance of one molecular species in; accession of sweet stimuli to receptors, 539
- Biological development, a mathematical model of, 609
- Biosystems, simple, on the structural complexity of, 1
- BIRCH, G. G. (see MUNTUN, S. L.), 539
- Blood pressure, rate sensitivity to hypoxia, 839

- BONT, W. S., The geometric progression of nuclear volumes, 505
- BORISOV, A. Y. (see FETISOVA, Z. G.), 41
- Brain, sensori-motor transformations in (with a critique of the tensor theory of cerebellum), 123
- Brain, why does it make lactate?, 429
- Branch length, Horton's law of, does it apply to open branching systems?, 299
- Branching structures of trees, a stochastic description, 667
- BRANSOME, E. D., JR., HENDRY, L. B., MULDOON, T. G., MAHESH, V. B., HUTSON, M. S. and CAMPBELL, L. K., Apparent stereochemical complementarity of estrogens and helical cavities between DNA base pairs: implications for the mechanism of action of steroids, 47
- BRICKMANN, J. (see KAPPAS, U.), 459
- BROWN, J. L. and PIMM, S. L., The origin of helping: the role of variability in reproductive potential, 465
- Cable theory with both ends sealed, general solution of, 727
- Calcium, potassium, and magnesium ion: calmodulin multiple equilibria and kinetics for interconversion, 157
- Calmodulin: calcium, potassium and magnesium ion multiple equilibria and kinetics for interconversion, including the effect of repeated stimulations, 157
- CALOW, P. (see SIBLY, R.), 553
- CAMPBELL, L. K. (see BRANSOME, E. D., JR.), 47
- CARO, T. M., Intersexual selection and cooption, 275
- Catalytic mechanism of serine proteases: the effect of the protein environment in the α -chymotrypsin proton relay system, 783
- Cerebellum tensor theory, a critique, 123
- CHELAZZI, G. (see FOCARDI, S.), 771
- Chemical presynaptic neurotransmission, a unified theory, 513
- Chemostat culture, relaxation times in, 589
- Chemotactic *E. coli* with Verhulst-limited population growth, stable heterogeneous spatial distributions of oxygen and (letter), 877
- α -Chymotrypsin proton relay system, the effect of the protein environment in; and the catalytic mechanism of serine proteases, 783
- COHEN, D., (see IWASA, Y.), 279
- COHEN, S. R., Why does brain make lactate?, 429
- Competitive games, tree height and crown shape as results of, 279
- Complexity, structural, of simple biosystems, 1
- CONRAD, M. and HASTINGS, H. M., Scale change and the emergence of information processing primitives, 741
- Continuous labeling curves, derivation of the frequency distributions of cycle durations from, 575
- Coooption, intersexual selection and, 275
- Corticalization in mammals, a theory of neuronal correlates of, 77
- Cross-species gene transfer: implications for a new theory of evolution, 333
- Crown shape and tree height, as results of competitive games, 279
- Culture, chemostat, relaxation times in, 589
- CUMMINGS, F. W., A model of pattern and form in development, 707
- Cycle durations, derivation of the frequency distributions of, from continuous labeling curves, 575

- DELVILLE, A., LASZLO, P. and NELSON, D. J., Calmodulin: calcium, potassium, and magnesium ion multiple equilibria and kinetics for interconversion, including the effect of repeated stimulations, 157
- DENEUBOURG, J. L. (see FOCARDI, S.), 771
- Development, biological, a mathematical model of, 609
- Development, a model of pattern and form in, 707
- Diapause of the migratory grasshopper, *Melanoplus sanguinipes* (Orthoptera: Acrididae), a unifying hypothesis of temperature effects on egg development and, 827
- DNA base pairs, apparent stereochemical complementarity of estrogens and helical cavities between; implications for the mechanism of action of steroids, 47
- DNA segregation, bacterial, a model based upon helical geometry, 25
- DNA sequences, protein-coding, a three-dimensional representation for base composition of, 433
- Dominance, absolute, of one molecular species in binary mixtures; accession of sweet stimuli to receptors, 539
- Doryteuthis bleekeri*, modified Hodgkin-Huxley gating kinetics of sodium activation in giant axons of, 695
- Dynamics, nearly one dimensional, in an epidemic, 403
- Ecology, plant, on the $-3/2$ power thinning law in, 535
- Egg development and diapause of the migratory grasshopper, *Melanoplus sanguinipes* (Orthoptera: Acrididae), a unifying hypothesis of temperature effects on, 827
- Energy, medium reorganization, and enzyme reaction activation energy, 221
- Enzymatic and nonenzymatic reactions, effective activation energy of; evolution-imposed requirements to enzyme structure, 251
- Enzymatic reaction activation energy and medium reorganization energy, 221
- Enzymes: stability of multienzyme systems with feedback regulation; a graph theoretical approach, 493
- Epidemic, nearly one dimensional dynamics in, 403
- Epidermis, frog skin, compartmental analysis of the Na^+ flux ratio with application to data on, 193
- EREMIA, D., Is there a continuity of filaments in the sarcomere?, 177
- E. coli*, chemotactic, with Verhulst-limited population growth, stable heterogeneous spatial distributions of oxygen and (letter), 877
- Estrogens and helical cavities between DNA base pairs, stereochemical complementarity of; implications for the mechanism of action of steroids, 47
- Evolution, a new theory of, and cross-species gene transfer, 333
